OPEN CALL

Master Student looking for a Master's Thesis?

Interested in Quantum Optics, Quantum Information and Quantum
Technology?

Would you like to gain experience in contemporary scientific research at
an international level?

We investigate quantum optical and quantum information processes with entangled photons for advanced applications in quantum technology, as well as fundamental physics experiments. Our main research activities are in three related areas: Quantum Communication and Technologies, Quantum Communication in Space and Gravitational Quantum Optics

The research group "EXPERIMENTAL QUANTUM OPTICS AND QUANTUM INFORMATION PROCESSING" headed by Dr. Rupert Ursin at the Austrian Academy of Sciences (ÖAW) is looking for highly motivated, interested Master-Students who want to contribute to contemporary science in a research-group working at an international level, while completing their Master's Thesis.

Duration: 1 Year

Contact: Dr. Rupert Ursin
